

UV Sanitization conveyer

To Enable Safer and healthier work life

Effective

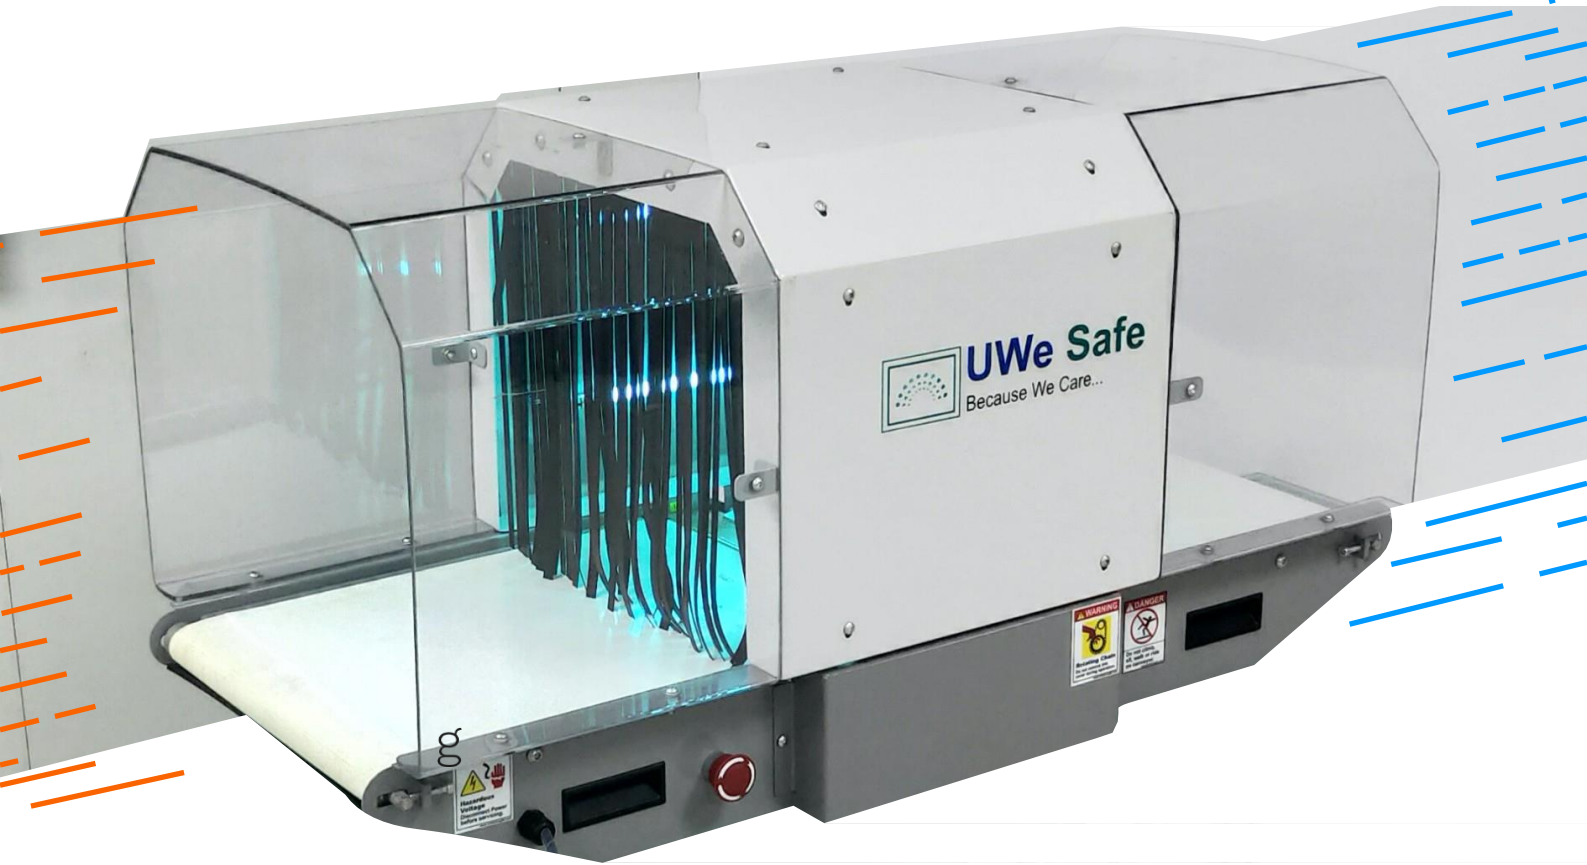

Contactless

Chemical-free

Coronavirus Sanitisation System

Immaculate Quality, NABL Lab Certified, FDA grade,
UVC sanitisation equipment

Mobile & tablets

Wallet

Keys

Bags

Books & documents

Parcels

and similar High Touch Point (HTP) essentials can be sanitised.

Why is the sanitization of HTP items necessary?

1 in 4 coronavirus infections are spread through high touch surfaces

2 out of 5 voices were re- shut down, post unlock 1.0 due to infections

How does UWe Safe help?

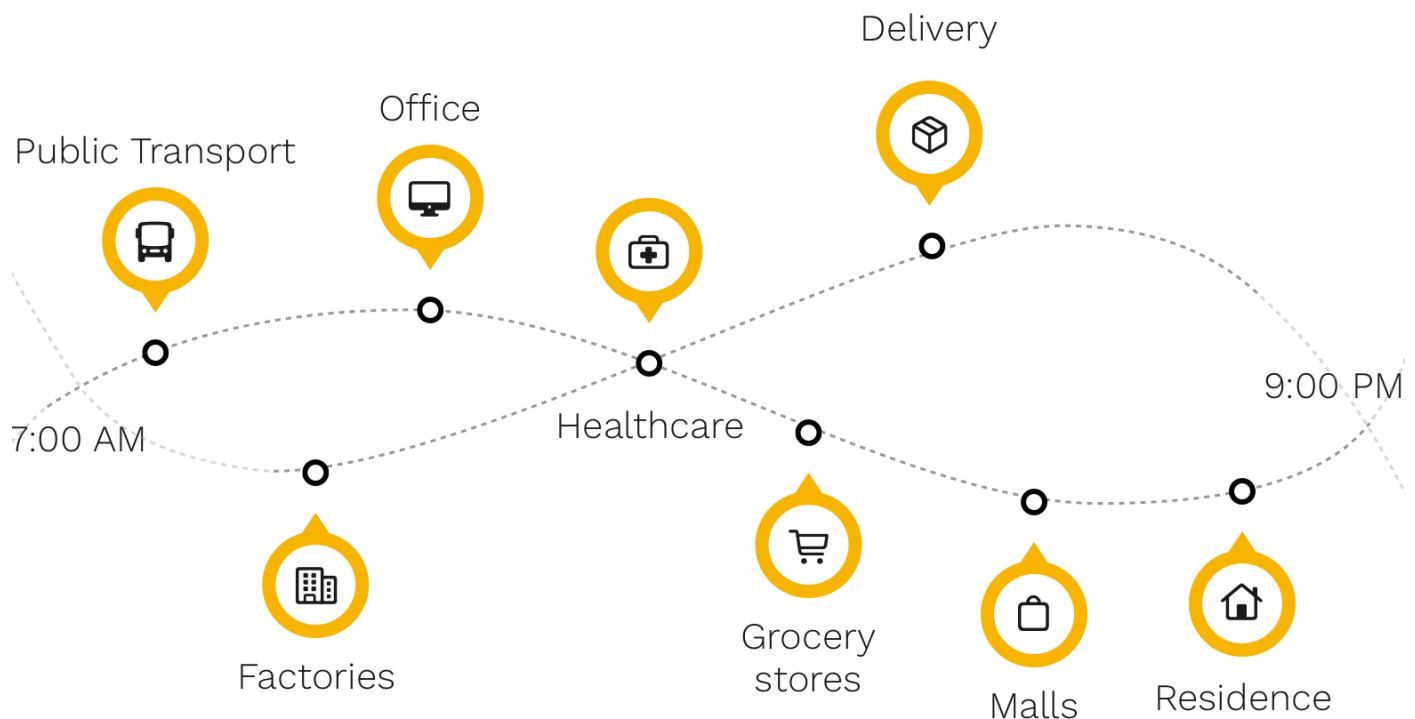

Complete 3-D sanitisation with 99.9% efficacy

Tested & certified by NABL accredited lab

Total Protection Everywhere

Why UWe Safe?

Complete 3D
sanitisation
(patent pending).

Approved by
government
authored micro-
biology lab

No touch
operation unlike
traditional UV
boxes.

Fastest sanitisation
- in 30 seconds.

ISO Certified
quality & safety

BUILDINGS SCHOOLS

WORKPLACE OFFICES

PUBLIC PREMISES TRAVEL STATIONS

In 2016, a team of young genius engineers from IIT Bombay successfully launched their own satellite "Pratham" with ISRO. They channelised the same passion and perfection to solve new challenges imposed by Covid. This time, in partnership with India's largest intelligent intra logistics automation company, Armstrong, they crafted this unique solution with high quality and uncompromising standards, to make your lives easy & safe - UWe safe!
